EXPERIENCE

Database Developer

June 2025 – Mar 2026

Katyayani Organics

Bhopal

- Migrated production database from **MongoDB** to **Supabase (PostgreSQL)**, redesigned schema with universal keys, unified contact data across **250+ sales agents** and removed duplicate records.
- Optimised backend queries in **PostgreSQL** cutting average response time by **60%** across order and inventory operations.
- Built ETL pipelines to push live transactional data into **Power BI** dashboards giving sales and warehouse teams real-time visibility.
- Cleaned and standardised **100K+ legacy records** across product, customer and order tables, improving data accuracy by **45%**.
- Masked sensitive contact details and enforced role-based data access at the database level so each agent only saw their own leads.
- Developed **FastAPI** backend endpoints for order lifecycle, inventory transfers, QR-based case tracking and shipping label generation.
- Set up real-time order status updates for field agents using **WebSockets** and **Firebase**, reducing support calls by **35%**.

Analyst, Automation & Business Intelligence

Mar 2024 – Jun 2025

Icon Tensile and Structure

Indore

- Studied existing sales and operations workflows, identified repetitive tasks and automated **6+ processes** using **Python** and **Google Apps Script**, saving **20+ hours** per week.
- Built a live sales tracking system with **Google Sheets API** and **Power BI** that moved reporting from weekly to daily, speeding up decisions by **50%**.
- Connected **WhatsApp Business API** for automated client follow-ups across **500+ clients**, improving response rates by **70%**.
- Cut quotation turnaround from **1.5 hours to under 10 minutes** by automating document generation with Python, handling **30+ quotes weekly**.
- Analysed 2 years of project data using **Flask** and **REST APIs** to surface cost and timeline trends reported to leadership.

Data Scientist

Sept 2023 – Feb 2024

Deep Thought EduTech Ventures

Hyderabad

- Built a hiring pipeline using **NLP** and **ML models** (Random Forest, XGBoost) that screened **500+ candidates** per cycle, cutting recruiter workload by **80%** and saving **24 hours weekly**.
- Developed a resume parser using Named Entity Recognition to pull structured data from CVs, then matched candidates to job descriptions using **TF-IDF similarity**, reaching **83% fit accuracy**.
- Processed **10K+ student feedback records** per term through a cleaning and transformation pipeline, then used sentiment analysis and topic modelling to group feedback into clear themes.
- Created **Power BI** dashboards showing feedback by course and instructor, adopted by leadership across **4 programmes**, contributing to **15% improvement** in student experience each cycle.

TECHNICAL SKILLS

Languages: Python, R, JavaScript, TypeScript, App Script

Data Science: Machine Learning, NLP, OpenCV, PySpark, Hadoop

Data Modeling: Pandas, NumPy

Databases: PostgreSQL, MongoDB, Supabase, OneLake, clickhouse

Technologies/Frameworks: FastAPI, Flask, Django, NodeJs, NestJS

Cloud/Tools: AWS Deployment, Linux/Unix, n8n, MCP Server, Docker, CI/CD, github

Visualization Tools: Power BI, Tableau, Excel, Google Sheets

ACHIEVEMENTS

- 7+ Generative AI certifications from LinkedIn Learning.
- Awarded scholarship of **Rs. 30,000** from DXC Technologies for academic performance.
- Recognised as Star Performer in professional photography at institute level.

EDUCATION

Examination	Institute	University/Board	CGPA	Year
BTech CSE:	Sagar Institute of Science and Technology	RGPV	7.6	June 2024
