EXPERIENCE

Database & Backend Developer

June 2025 – Mar 2026

Katyayani Organics

Bhopal

- **TrackPack (Inventory & Order Management System):**
 - Built scalable backend APIs using **FastAPI**, **PostgreSQL**, and **MongoDB** for warehouse inventory transfers and order processing.
 - Implemented SKU bin management, QR-based case tracking, inward/outward logistics, and shipping label generation integrated with delivery partners.
 - Enabled real-time driver tracking and order updates using **WebSockets**, **Firestore**, and **FCM**.
 - Developed case-level traceability system to track each product case from warehouse to final order delivery.
- **Sales Operations Portal (Full Stack CRM System):**
 - Developed end-to-end CRM platform using **React (TypeScript)**, **FastAPI**, **MongoDB**, and **PostgreSQL**.
 - Implemented multi-role dashboards (Agent, Floor Manager, Sales Head) with revenue analytics and order lifecycle tracking.
 - Automated lead distribution using **n8n** workflows with performance-based assignment and round-robin logic.
 - Integrated OAuth authentication, FCM-based notifications, and real-time agronomy suggestions using WebSockets.

Google Sheet Automation and Analyst

Mar 2024 – Jun 2025

Icon Tensile and Structure

Indore

- Automated workflows using **Python** and **Google Apps Script**, streamlining operations and eliminating manual tasks.
- Integrated **WhatsApp API** for real-time messaging, improving client communication by **70%**.
- Built a real-time sales tracking system using **Google Sheets API**, enhancing performance visibility.
- Reduced quotation processing time by **1.5 hours** per request through Python-based automation.
- Developed internal tools using **Flask/Django** and **REST APIs** to support workflow automation and data extraction.

Data Scientist

Sept 2023 – Feb 2024

Deep Thought EduTech Ventures

Hyderabad

- **Recruitect (Hiring Automation System):**
 - Objective: Streamlined hiring to focus on cultural fit and skill alignment with organizational requirements.
 - Automated candidate hiring processes, reducing workforce effort by **80%**.
 - Saved approximately **24 hours** weekly through automation.
 - Achieved an **83% success rate** in recruiting candidates who aligned with the company's culture and values.
- **PGDMS (Student-Centric Feedback System):**
 - Objective: Enhanced student learning experience through data-driven feedback analysis.
 - Developed a **data pipeline** to streamline and preprocess student feedback data.
 - Leveraged **NLP techniques** to segregate feedback into positive and negative categories.
 - Visualized insights using **Power BI dashboards**, enabling actionable strategies for teaching improvements.
 - Achieved a consistent **15% improvement in student experience** during each iterative enhancement cycle.

TECHNICAL SKILLS

Languages: Python, R, JavaScript, TypeScript, App Script

Data Science: Machine Learning, NLP, OpenCV, PySpark, Hadoop

Data Modeling: Pandas, NumPy

Databases: PostgreSQL, MongoDB, Supabase, OneLakeSheets

Technologies/Frameworks: FastAPI, Flask, Django, NodeJs, NestJS

Cloud/Tools: AWS Deployment, Linux/Unix, n8n, MCP Server, Docker

Visualization Tools: Power BI, Tableau, Excel, Google

ACHIVEMENTS

- Awarded by a start performer title as a professional photographer for Institute
- Awarded with a scholarship of worth 30000/- from DXC Technologies for good academic record
- Holder of 7+ certifications as a Generative AI Developer from LinkedIn.

EDUCATION
